Hiring Team
BMW Group
Munich, Germany

Subject: Application for Intern Software Development (f/m/x) at BMW Group

Dear Hiring Team at BMW Group,

When I saw the opportunity to intern in software development at BMW Group, I knew I had to apply! As an Informatics student with hands-on experience in backend development and a passion for building impactful applications, I am excited about the chance to contribute to your cutting-edge projects in electric drive machines and automatic transmissions.

While I may not be pursuing a master's degree yet, I have already built multiple applications demonstrating my ability to design, develop, and optimize software solutions. My projects, including a **CRUD-based patient record system** and a **football event management app**, showcase my expertise in **Flask, SQL, REST APIs, and backend architecture**. You can find samples of my work on my GitHub: [GitHub Link](#).

Beyond backend development, I have a keen interest in **problem-solving and automation**, making me particularly excited about the opportunity to develop **automated KPIs** for project management at BMW. I thrive in **structured environments, enjoy tackling technical challenges**, and am eager to apply my **solution-oriented thinking** to your team's mission.

BMW's commitment to **innovation, performance, and excellence** resonates deeply with me, and I am eager to contribute my skills while learning from top professionals in the automotive industry. Given my strong technical background, adaptability, and **fast-learning mindset**, I am confident that I can bring value to your team.

I would love the opportunity to discuss my application further and explore how I can contribute to BMW Group's vision. Looking forward to your response!

Best regards,
Mohammad El Masri
